EDUCATION

B.Tech	IIT (BHU), Varanasi	2021
12 CBSE	Guru Nanak Public school, Kota	2017
10 CBSE	St. John's Sr. Sec. school, Kota	2015

WORK EXPERIENCE

Salesforce

Dec,2023-Present

SDE - 2

- Designed and integrated GA4 instrumentation across the entire AppExchange site using the Factory Pattern
- Created and resolved multiple Appexchange API issues to enhance the site recommendation system.
- Built a contextual chat-based search feature, enabling users to receive tailored app recommendations through an interactive agent, enhancing AppExchange discoverability.
- Driving the transition from Coveo to Salesforce Hybrid Search for the AppExchange platform, optimizing search capabilities and leveraging Salesforce-native solutions.

Societe Generale

Aug,2021- Dec,2023

Software Developer

- Developed an employee dashboard, providing a centralized and user-friendly interface for efficiently managing employee information, tasks, resource access status and performance tracking used by 150K users.
- Utilized HTML/CSS, Tailwind, ReactJs and Javascript to create a modern and responsive UI design.
- Developed a custom React hook for seamless dark and light mode switching in the background theme.
- Implemented advanced search filters, including keyword search, multiple select, and single select options, enhancing the tool's usability and data exploration capabilities.
- Integrated caching mechanisms and error handling to optimize data retrieval using React Query library
- Monitored Elasticsearch cluster performance using monitoring tools such as Kibana.
- Developed REST API endpoint for MyOPRisk tool using NodeJs and MongoDB database.
- Authored API solutions in Express.js with authentication, caching for access management in multi-tenant setup.
- Implemented middleware to validate user schemas, ensuring the consistency of user data in the application.
- Contributed to code reviews, testing and debugging, ensuring high-quality code by using best practices.

WeCP

Feb,2021-Apr,2021

Software Developer Intern

- Developed code collaboratively with Agile squads to produce UI for skills and training assessments platform.
- Frontend was built using AngularJs Framework and designing was accomplished using Tailwind CSS.
- Troubleshoot and debugged frontend code ensuring compatibility with devices, browsers, and OS.
- Used AWS services like CodeCommit, DynamoDB and Amazon Lambda, clustering to maintain the website.

PROJECTS

Real Time Chat application

- Built a real-time chatbox on which multiple users can chat using different chat rooms at the same time
- Socket library was used for real-time bi-directional communication between the frontend and backend
- Used **Nodejs** environment to handle the backend and UI was designed using HTML/CSS and the Bootstrap

ACCOMPLISHMENT

- Achieved 1600+ rating in Codeforces and 1750+ in LeetCode
- Reached the final round of Microsoft Code.fun.do++
- Completed Golang course on Codecademy

SKILLS

- Docker
- Kafka
- ReactJS
- AngularJS
- MongoDB
- Golang
- C++
- Javascript
